Description of Noncompliance :

Description of the Noncompliance :	Based on the Daimler AG (DAG) recall 17V364; the manufacturer of Mercedes-Benz SPRINTER vans, has determined that certain Mercedes-Benz SPRINTER vehicles might have been equipped with incorrect tire pressure labels on the B-pillar, showing a tire pressure which might be too low for the reinforced front axle.
FMVSS 1 :	567 - Certification
FMVSS 2 :	NR
Description of the Safety Risk :	Based on the Daimler AG (DAG) recall 17V364; as a consequence vehicles with a reinforced front axle may have tire pressure below specifications. The tire temperature of the affected vehicles in operation may increase and consequently damage to the tire over time cannot be ruled out. This could increase the risk of a crash.
Description of the Cause :	Based on the Daimler AG (DAG) recall 17V364; during the assembly process it is possible that the tire pressure labels for the vehicles with a reinforced front axle were mixed with the variants for other front axle configurations.
