Included is the Voice of Customer 6 panel cover sheet addressing Emerging Issue # 328534. We believe that issues associated with the Teleflex Lube Migration issue is tainting our 3 track ETC pedal. We were able to get 5 returned pedals thru a calibration truck today. The pedals executed flawless performance under multiple loading conditions. These pedals were initially returned to supplier and verified good. We have initiated the process thru QRT to send a Special Service Message (SSM) to our dealerships. As noted, Greg West called one dealership that had recently replaced 4 pedals. Service manager could not speak with authority about diagnostic procedure. Just replaced pedals because of previously known issue. Also, I believe warranty dollars include recall parts and are incorrectly represented. I included data directly out of AWS. Any questions, home # (313) 388-6938.

6-PANEL – Emerging Issue Summary

E-Tracker ID # 328534	CCC: Engine Hes/Surge when accelerating	
Name: Larry Liposky	Project Champion: Pat Figurski	Organization: CAPE
Date Published:2/13/03	Status: Open	Part #/ Process Name: 8F536 ETC Pedal

BEGINNING VOICE OF THE CUSTOMER

- Y=f(x) CASCADE: From AWS Verbatim " Vehicle Lacks Power" " Intermittent Throttle Response"
- PROJECT CLASSIFICATION:
  Total Potential Warranty Spending:
  MY YTD Repairs: Emerging Issue (526). AWS (56)
  MY Warranty Spending YTD: Emerging Issue ($211,481 YTD CPR $401). AWS ($13,237 YTD $ CPR $228)
  VOICE OF THE CUSTOMER: Engine Hesitates / Lacks Power
- CTQ STATEMENT (Customer Requirement): Smooth Acceleration on Tip-In Expected
- DEFECT DEFINITION for Y (Engineering Metric): TBD
- PROBLEM STATEMENT, SCOPE, AND GOAL

Search of AWS includes 29 Teleflex adjustable pedals, 15 Williams fixed pedals, and 14 unknown due to poor dealer write-up. Of the 29 Teleflex pedals, 6 pedals total sited legitimate DTC's in AWS . Of the 15 Williams pedals, 3 sited legitimate DTC's in AWS.
Returned pedal analysis:
Williams: 3 of 3 NTF at supplier and further verified on calibration truck functionally acceptable.

Teleflex: 2 of 2 NTF at supplier and further verified on calibration truck functionally acceptable. One of these pedals had a DTC specific to pedal, however pedal was verified acceptable.

These codes can be potentially set due to poor wire connection or electrical shorts.

Spoke directly with Service Manager of dealership which replaced 4 pedal assemblies. Ran pin-point test, did not set DTC's but replaced pedal assembly anyway. We believe majority of pedals are mis-diagnosed and currently pursuing a SSM to validate pedals before replacement. Previous issues associated with ICP and Calibration can cause similar Hesitation issue and or intermittent throttle response.
