RESULT OF INCIDENT

☐ Explosion/Fire
☐ Loss of Control
☐ Poor Visibility
☐ Inadvertent Start
☐ Rollover
☐ Stalls
☐ Sudden Acceleration

I bought my 2001 Ford Focus at Suburban Ford on Madison in Sac. Jan. 2001. It will be 2 years old in Jan 2003 & they say it already needs brakes, Front & Back at 15,000 miles. I took it to another Brake shop for second check & they said it did need brakes. It should not need Back brakes before 30,000 miles & they do not have a warranty for the brakes! I was wondering do you have a recall for Ford for the brakes they said they have had some Focuses come in for brakes.

1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

2. Next, it is important to gather relevant information and resources. This can include researching existing solutions, consulting with experts, and identifying the tools and materials needed.

3. Once the information is gathered, the next step is to develop a plan or strategy. This involves breaking down the problem into smaller, manageable tasks and determining the sequence of steps to be followed.

4. The fourth step is to execute the plan. This involves carrying out the tasks identified in the plan, using the resources available, and monitoring progress along the way.

5. Finally, it is essential to evaluate the results and reflect on the process. This involves assessing whether the problem has been solved, identifying any challenges encountered, and considering ways to improve the approach for future tasks.
