INFOTAINMENT MESSAGING FOR OVER-THE-AIR UPDATE

RECALL ID

Kia: SC341 / NHTSA: 25V351

INSTALLATION

Once the over-the-air (OTA) software has been automatically downloaded and the background update is finished, the software update will be available to install.

Pop-up Screen Text after Engine is turned off:
When you select [Update Now], the screen will turn off and the navigation update will start. Navigation will turn off automatically after the update.

- Use Auto-Install Updates [Check box]
- Update Now [selectable]
- Details [selectable]
- Later [selectable]

DETAILS SCREEN TEXT

Use of all functions, including sound, is limited during the update.

- Total Update Time: 5 Minutes

UPDATE DETAILS

Important OTA Software Update
Software Version: 25.7.1 (subject to change)
MCU: DL3.US.ECUOTA.002.250512(25.7.1) (subject to change)

This OTA update provides the following improvements to resolve Noncompliance Recall SC341.

This important update is to remedy the Power-net Domain Controller (PDC) software logic. When the turn signal is activated while the headlamps are activated in a steady burning state or while the parking lamps are activated, the corresponding parking lamp does not illuminate in a steady burning manner. As a result, the subject vehicles do not comply with the conspicuity requirements of Federal Motor Vehicle Safety Standard (FMVSS 108) "Lamps, reflective devices and associated requirements", thereby increasing the risk of a crash.

If the OTA software update is unsuccessful, you are advised to bring your vehicle to a Kia dealer to complete Recall SC341.
