Subject	Stop Sale/Safety and Emissions Recall: 2004-05 S2000 Fuel Flange Joint Inspectio							

DATE: November 13, 2026

TO: All Honda Sales, Service & Parts Managers, and Personnel

FROM: Auto Campaigns and Recalls Department

Re: Stop Sale/Safety and Emissions Recall: 2004-05 S2000 Fuel Flange Joint Inspection

On November 12, 2026, American Honda notified NHTSA of a **stop sale** and **safety recall** for certain 2004-2005 S2000 vehicles. A small number of fuel flange joint service parts may have been manufactured without the required brazing material at the joint-to-flange connection. This condition may allow the press-fit connection to loosen and separate, resulting in fuel leakage, reduced fuel pressure, an engine stall while driving, or a no-restart condition. An engine stall while driving may increase the risk of a crash or injury. **Refer to your eResponsibility report or perform an iN VIN status inquiry to determine which units in your inventory are affected.**

REPAIR

Inspect the fuel flange joint and, if necessary, replace the fuel flange joint assembly.

PARTS

Parts needed for inspection will be available via normal ordering. The repair kit will be controlled by the Repair Verification Team (RVT).

TOOLS

There are no new special tools needed for this recall.

SERVICE BULLETIN

Service Bulletin 26-093, *Safety Recall: 2004-05 S2000 Fuel Flange Joint Inspection* has posted to the Service Information System (SIS) as of November 13, 2026. It includes inspection, repair, and warranty claim information related to this recall.

OWNER NOTIFICATION

American Honda expects to begin owner notification in early January 2027.

As always, perform an iN VIN status inquiry for all vehicles passing through your dealership to determine eligibility for any open campaigns.
