INSTRUMENT PANEL TRIM FADING

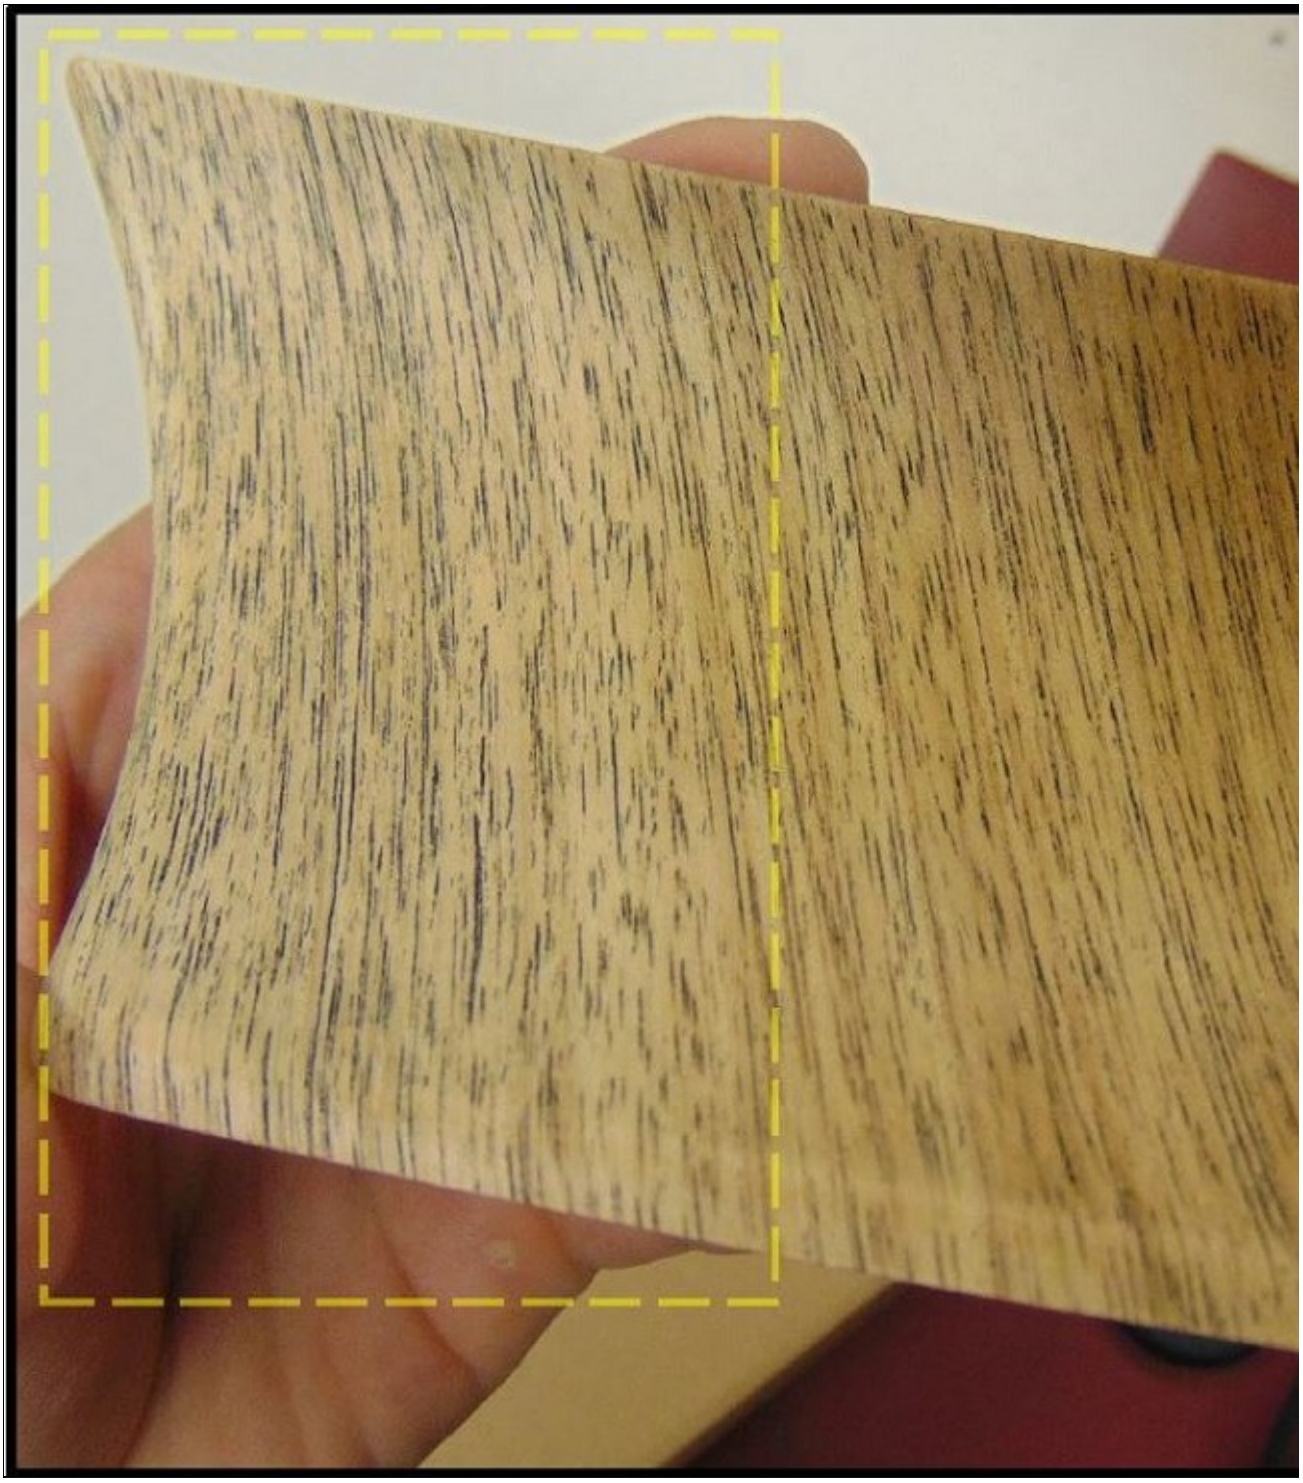
MODEL

i01 (i3)

SITUATION

On i01 vehicles with option code 7KY (Giga) or 7KZ (Tera), the decorative eucalyptus wood trim may fade over time. This is considered normal fading and not a defect.

As the eucalyptus wood trim is made up of untreated real wood veneers. Due to environmental influences (e.g.: solar radiation), differences in color shade or fading can occur with these finishes.



INFORMATION

Do not replace parts.

Untreated wood finishes are a natural product that are meant to both ensure and underscore the sustainability of BMW i vehicles. A part replacement will not correct this issue.

WARRANTY INFORMATION

Wood trim and leather upholstery have inherent variations in color and texture, dependent upon being properly cleaned and maintained. These items may lighten or darken due to age or exposure to sunlight; this is not a defect in materials or workmanship.
