DRIVER'S SEAT HAD A PIECE OF METAL WHICH WAS EXPOSED, AS A RESULT, CONSUMER CUT HER LEG *AK and required 9 stitches. several others have been hurt. The metal is only exposed when the driver seat is pushed forward. to allow the passenger in the back to exit. If the seat is back for a tall driver, there really is no way for a backseat passenger to exit without injury. my daughter has a permanent scar and damage to her leg.

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.
