APPLICABLE INCIDENT INFORMATION

(Please describe in detail the incident(s), failure(s), crash(es), and injury(ies). Attach photos if available.)

Crash ☐ Yes ☐ No Fire ☐ Yes ☐ No Number of Persons Injured _____ Number of Fatalities _____ Reported to Manufacturer Dealer ☒ Yes ☐ No

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies). Standard Wheels or Rims Used are Constructed in a nature that They Hold Mud-Ice-Snow bet. in and near Valve Stems. This not only is a Hazard due to Possible Valve Stem Failure, But also causes a loss of control due to wheels or Rim becoming unbalanced. This cause front end and steering wheel to shake and vibrate until Rims are Washed Clean. Very Poor Design for 4Wheel Drive SUV that was meant to go through Mud-Snow-Snow Etc.

The Privacy Act of 1974 - Public Law 93-579 This information is requested pursuant to 49 U.S.C. Chapter 301. You are under no obligation to respond to this questionnaire. Your response may be used to assist NHTSA in determining whether a manufacturer should take appropriate action to correct a safety defect. If NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

~~It~~ I feel not only is ~~jeep~~ advertising
this vehicle faulty, but they are also
putting people in danger unnecessarily.
I have contacted dealer & manufacture and was
told that this was not a concern and
that most likely a manufacturing problem only
maybe they should look at some of these
own models about where there gaps are for
P.S. wheels or rims should be recaked.
Jeep should know better by now, or made to
tell customers - DO NOT USE IN Mud-SNOW-DIRT
THANK YOU - I will stay on hard, dry, clean roadways
