Narrative Description of Incident(s), Crash(es), and Injury(ies).

Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e. parts repaired or replaced (and if old part is available).

THERE WAS STRONG FUEL ODOR ON THE INSIDE AND OUTSIDE OF THE VEHICLE. THIS WAS DUE TO A LEAK IN THE FUEL RAIL. THE NYLON TUBING IN THE FUEL RAIL DEGRADED AND CRACKED. RECALL 04V110000 WAS ISSUED, BUT THIS VEHICLE WAS NOT INCLUDED DUE TO VIN. \*AK

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.

ATTACH ADDITIONAL SHEETS IF NECESSARY

The Privacy Act of 1974 (Public Law 93-579) This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

I did call GM (800-442-6537) to let them know about this problem and they told me that my car's VIN is not in their database for recalls.

The reference # they gave me is 1-202880738

Attached are copies of the bill to repair the problem and a copy of the info. from The Internet

**Please visit: Fuel rail recall**

**HARDTIMER**

WASHINGTON — General Motors Corp. is recalling 93,572 Oldsmobile Aurora sedans because fuel can leak into the engine and start a fire, the federal government said Friday.

The recall affects Auroras from the 1995-1997 model years.

The National Highway Traffic Safety Administration said it has received 123 complaints about the problem. In one case, a fire started while the vehicle was parked in a garage attached to a home. The vehicle was destroyed and the home was damaged, NHTSA said.

The agency said the fuel is leaking because the nylon tubing used in the fuel rail can degrade and crack. Owners will be notified later this spring of GM's plans to repair the vehicles.

NHTSA also said Friday that DaimlerChrysler AG is recalling 34,561 Pacifica sport utility vehicles and 14,621 Jeep Grand Cherokees because their engines could stall without warning and cause a crash. Vehicles from the 2004 model year are affected in those recalls.

**BKVic**

Do a search, I posted about this two weeks ago.

BKVic

**HARDTIMER**

oops sorry just thought I was being helpful, sorry all for the trouble.

**97 silverbullet**

no trouble, give us updates if you hear any.
