Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies).

R.F. Bulb socket terminals corroded so badly to destroy the terminal. The bulb quit working. When this happened it seem the left hand continuity & the R. rear stop/tail light also stopped working.
The R.F. Light originally failed approx. 18 months ago at approx. 25,000 miles. This wasn't discovered until last fall when I attempted to replace the R.F. bulb & lost continuity in the circuit causing not only the R.F. light but rear tail/stop light to fail too.

The Privacy Act of 1974 - Public Law 93-579 This information is requested pursuant to 49 U.S.C. Chapter 301. You are under no obligation to respond to this questionnaire. Your response may be used to assist NHTSA in determining whether a manufacturer should take appropriate action to correct a safety defect. If NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.
