[REDACTED]
Baytown, TX [REDACTED]

Dear [REDACTED]:

Thank you for your correspondence dated August 6, 2004, requesting that the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation (ODI) reopen its safety defect investigation into Firestone Steeltex tires. Your correspondence was received on August 30, 2004. Due to the overwhelming number of letters received by ODI and the limited resources available to this agency, we were not able to respond in a more timely manner.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain serious safety defects in their design, construction, or performance. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. Each report is analyzed and entered into a database to determine whether an investigation into a possible safety defect is warranted.

NHTSA's Office of Defects Investigation (ODI) closed an investigation (PE00-040) into tire failures involving Firestone Steeltex R4S, R4S II, and A/T light truck radial tires on April 9, 2002. A copy of the resume and closing report for this investigation are enclosed for your information. In November 2002, the Law Offices of Lisoni & Lisoni and the Law Offices of Steven E. Weinberger petitioned NHTSA to reopen its investigation (DP02-011). On June 16, 2003, ODI denied that petition after conducting a thorough analysis of information submitted in support of the petition, data in our own database, and information obtained from Bridgestone/Firestone, Inc. (Firestone). The petition resume and the analysis presented in the Federal Register notice regarding the denial of that petition are also enclosed for your information.

888-327-4236

On May 12, 2004, ODI received two additional petitions from the Law Offices of Lisoni & Lisoni. In their first petition (DP04-004), the petitioners requested that NHTSA reopen its previous investigation into Firestone Steeltex light truck radial tires due to an alleged defect in their design and performance. The second petition (DP04-005) was limited to an alleged defect in their design and performance, particularly taking into consideration those Steeltex tires installed on ambulance and emergency response vehicles. On September 28, 2004, ODI denied both petitions after conducting a thorough analysis of information submitted in support of the petition, data in our own database, and updated information obtained from Firestone. The petition resumes and the Federal Register notice explaining the denials are enclosed for your information.

You can contact our toll-free DOT Auto Safety Hotline (Hotline) at 1-888-DASH-2-DOT (1-888-327-4236). One of our representatives may be able to assist you on matters concerning motor vehicle and motor vehicle equipment safety recalls or to report an alleged safety problem. You can also request safety information. If our telephones are busy, or you call during non-working hours, you can leave your name, telephone number, and a brief subject on our recording system. A DOT Hotline representative will return your call.

Additionally, we have an Internet Web site at <http://www.nhtsa.dot.gov> that you may want to visit. An electronic Vehicle Owner's Questionnaire (VOQ) is also available on this Web site at <http://www.nhtsa.dot.gov/ivoq>. This form is for vehicle owners to report safety related problems about their motor vehicles or motor vehicle equipment, e.g., child safety seats, jacks, tires, brake fluid, etc. The reports submitted are transferred to our database and are used to identify safety-related defect trends that require our attention. If you do not have access to the Internet, please use the enclosed VOQ to inform this agency of any future motor vehicle or motor vehicle equipment safety problems you may experience. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc., can be obtained at <http://www.nhtsa.dot.gov/cars/problems>.

If further assistance is needed, please contact Mr. Michael J. Jordan, Safety Defects Program Assistant, Correspondence Research Division, Office of Defects Investigation, at (202) 493-0576.

Sincerely,

Alberto A. Jimenez, Chief
