If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

Dealer or manufacturer put out a safety recall for engine camshaft sensor failure with a possibility of engine fire, but no dealers who are left working on these vehicles. I had my camshaft sensor changed by a local mechanic because my engine warning light remained on prior to the recall letter, but still have no way of knowing whether a good sensor was installed. General Motors was supposed to support these vehicles for 5 years from the bankruptcy date of 2002. GM should put out information and make parts available so local mechanics could repair vehicles and eliminate potential car fires or give a list of places who are authorized to repair instead of putting out a letter they think covers their liability. The phone numbers they give don't work.
