Narrative Description of Incident(s), Crash(es), and Injury(ies).

Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e. parts repaired or replaced (and if old part is available).

ANTI FREEZE LEAKED OUT OF THE ENGINE. THIS HAPPENED FREQUENTLY, EVEN AFTER ANTI FREEZE WAS REFILLED. *AK

Anti freeze was filled in my (engine) there were no leaks outside the engine. Anti freeze leaked internally inside the engine, because defective parts were used in the making of the engine which exceeded air pollution control standards,

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.

ATTACH ADDITIONAL SHEETS IF NECESSARY

The Privacy Act of 1974 (Public Law 93-579) This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

I was using a gallon of Anti Freeze a week. Intake manifold gaskets they were made out of plastic could not withstand normal use. This is the second engine I had with the same problem this time. I had the mechanic open the engine up inside, build up with anti freeze & oil mixed together it looked like gel & anti freeze color was inside engine oil. fumes were coming from the engine, inside the car & out of the exhaust system into the air.
