Narrative Description of Incident(s), Crash(es), and Injury(ies).

Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e., parts repaired or replaced (and if old part is available).

WHEN THE CONSUMER DROVE OVER 5 MPH THE WHEEL SENSOR KICKED IN AND THE VEHICLE WILL NOT STOP. THE CONSUMER HAD THE BRAKES SERVICED. *JB

The sensor in the wheel bearing is reporting bad information. A driver can not stop the vehicle and any one or any thing faces an impact. I know! I almost drove into my garage.

Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.

The Privacy Act of 1974-Public Law 93-579 This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

I purchased the truck used and didn't think the problem was other than the brakes. I had all 4 replaced but it didn't fix the control failure when the computer takes over the brakes, you can't stop it, no matter what. This will kill someone or someone. It doesn't tell you it's going to fail you just find yourself with no brakes.
