Complaint Information

Description : In 1987 I purchased a new Honda Accord. About 7-1/2 years later this what occurred. I was pulling into a parking space and all of a sudden the car surged forward at a rapid pace and it hit a building. There was damage to the building and the car. No one was injured. I drove the car 3 years after that. Then I gave the car to my son and in about 1999 the same thing happened to him with the 1987 Honda. In 1997 I bought a Honda Civic (no belts or whistles). About 7-1/2 years later this is what happened. I was parking the car and all of a sudden it surged forward at an uncontrollable speed the same as it did in the 1987 Honda Accord. I hit the side of a building, turned the wheel to avoid going through the windows of the building, hit another car, then finally the car slowed down some and I put the car in park. Since this has happed to me two times I am petrified to drive my car again. No one was injured. Please do not think I stepped on gas. This is ridiculous, when parking a car you slow down and use the brake. As this car was surging forward, I had my brake to the floor. I could not stop what was happening. Please help me with this situation. Thank you very much. I searched the NHTS - Office of Defects Investigation - I found 10 incidents of this happening with the 1987 Honda Accord. What is to say this can also be true of the 1997 Honda Civic

Incident Date : 1/3/2005

Fire : No

Num. Failures : 1

Property Damage : Yes

Num. Deaths : 0

Crash : Yes

Num. Injured : 0

Police Report : No

Referral Source : ACQUAINTANCE
