cracked intake manifold on my 1997 mercury marquis

I bought a 1997 mercury marquis, I gave the car to my daughter about a year and half ago . the car started to leak water, a water pump was replaced. it turned out to be that the intake manifold was cracked. I contacted the ford Company, and received no satisfaction. my daughter had the car repaired at a Ford dealer at a cost for about \$ 1000.00
