Subject: My 95' f-150 caught on fire

APR 12 2005

From: [REDACTED]

Comments:

I read your article on the 95-99 f-150 starting on fire due to bad switches. My F-150 caught on fire in my garage 3-years ago i called ford regarding any recalls- they said they couldn't help me. I was wanting to know if you could tell me who could help.

my neighbor even took pictures of my truck on fire and what the truck looked like afterwards- if that would help
From NHTSA Web Site.
