To whom it may concern

My name is

My wife and i bought a 2003
Spider Mitsubishi the car was used,
but it carried a new Car warranty
they dealer told us. We test drove
the car & it ran fine once we
drove the car 20 miles or so the
Car engine began to tick we
immediately took the car back to the
dealer ship & reported that the car
had issues such as Brakes squeaking,
Head light, out & Bad tires, radio -
speakers were blown we took the car
back to the dealer & they kept the car
for several hours & called us & told
us the things we were reporting
were under the new Car warranty
& we had to take the car to a Mitsubishi
dealer to have the car repaired &
than ask them could i have my money
back they told me they weren't into
buying cars so i ask could i give
them the car back & pay a few more
thousand more to get a brand new
Spider they told me, No i had to
have the car fixed myself
Keep in mind i paid Cash for
this car \$20,000 Cash & i felt burned

One More
4/24/05

So we took the car as they requested to the Mitsubishi dealership & told them about the problem they took the car for 2 days & called us & told us we would ~~have~~ have to pay \$400⁰⁰ for the repairs because it wasn't under the warranty my question to you is there something i can do about this & plus now they just sent me a letter 6 months later telling us we have to have the car smog in order to get our license plates & the car registration.

So let's look at the picture i'm seeing we paid \$20,000 cash for a used car with a new car warranty that needed 4 tires, a head light blown, blown speakers turning signal were blown, reflectors on doors were missing & we still have a tick in the engine & it's getting louder & now we have to have car smog to get the car re-registered & license plates & my question to you is there something we can do about this situation i feel they took my money & treated us like shit once deal was completed

Please respond to my question
