THE FUEL LINE IS ALSO CONTAMINATED DUE TO RUST. CAR WOULD NOT START, AND NOW STALLS IN TRAFFIC. FUEL IS LEAKING OUT OF THE CARBURATOR, AND IS A FIRE HAZARD. *AK

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

The Fuel Tank Filler Neck on my 1984 Honda Accord was rusted through which caused contaminated fuel to plug the primary and secondary fuel filters and contaminated my carburetor. The Jeff Wyler Honda Dealership (Invoice is included with this questionnaire) replaced my filler neck free of charge but the car is still unsafe to drive because the carburetor is leaking fuel which could result in a fire hazard. I feel that American Honda Inc. should be held liable to get my car running properly because that rusted filler neck is the cause.
