Ref. No.10120407

Johnson City, TN

Dear

Thank you for your correspondence dated April 20, 2005, concerning your 1998 Ford Windstar vehicle. Your correspondence was received on April 29, 2005. Due to limited resources we were not able to respond to you in a more timely manner. We regret any inconvenience our delay may have caused you.

The National Highway Traffic Safety Administration (NHTSA) is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain serious safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. Each report is analyzed and entered into a database to help us determine whether an investigation into a possible safety defect is warranted.

The agency has received a wide variety of complaints on anti-lock brake systems (ABS) which fall under the very broad category of "poor brake performance." Typical of many brake complaints, the failure mode is difficult to quantify in that many problems are intermittent and cannot be readily duplicated, thus making it difficult to determine exactly what type of failure may be occurring. Your ABS problem, along with other complaints in our database, has been reviewed and no unique failure mode was identified. Therefore, there is insufficient basis to initiate a safety-defect investigation at this time. However, the information you provided has been entered into our database. It will be considered with future reports to identify any safety defect trends that may require the initiation of a safety defect investigation.

DOT AUTO SAFETY HOTLINE
888-DASH-2-DOT
888-327-4236

Clearly, transmission failure and the cost of its replacement is frustrating. While frustrating, the type of transmission problem you described is not related to motor vehicle safety within the meaning of our authorizing statute. The agency has no jurisdiction over non-safety defects, warranty, and remuneration matters. If you have not done so, you may consider contacting your local Consumer Protection Agency, Better Business Bureau, or the Tennessee Office of the Attorney General regarding your problem.

You can contact our toll-free Vehicle Safety Hotline (Hotline) at 1-888-327-4236. One of our representatives may be able to assist you on matters concerning motor vehicle and motor vehicle equipment safety recalls or to report an alleged safety problem. You can also request safety information. If our telephones are busy, or you call during non-working hours, you can leave your name, telephone number, and a brief subject on our recording system. A Hotline representative will return your call.

Additionally, we have an Internet Web site at <http://www.nhtsa.dot.gov> that you may want to visit. An electronic Vehicle Owner's Questionnaire (VOQ) is also available on this Web site at <http://www.nhtsa.dot.gov/ivoq>. This form is for vehicle owners to report safety related problems about their motor vehicles or motor vehicle equipment, e.g., child safety seats, jacks, tires, brake fluid, etc. The reports submitted are transferred to our database and are used to identify safety-related defect trends that require our attention. If you do not have access to the Internet, please use the enclosed VOQ to inform this agency of any future motor vehicle or motor vehicle equipment safety problems you may experience. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc., can be obtained at <http://www.nhtsa.dot.gov/cars/problems>.

If further assistance is needed, please contact Mr. Michael J. Jordan, Safety Defects Program Assistant, Correspondence Research Division, Office of Defects Investigation, at (202) 493-0576.

Sincerely,

Alberto A. Jimenez, Chief
Correspondence Research Division
