DT: THE CONTACT OWNS A 2005 CHEVROLET TRAILBLAZER. HE STATES THAT THE WINDSHIELD ON DRIVER'S SIDE LOOKS AS IF ONE WAS LOOKING THROUGH A MAGNIFYING GLASS AROUND THE EDGES OF THE WINDOW. THIS HAPPENS ON THE PASSENGER SIDE, BUT IS WORSE ON THE DRIVER'S SIDE. ALSO, ON THE WINDSHIELD THERE IS A WAVY EFFECT THROUGH THE FIELD OF VIEW AND MAKES THIS DISTRACTING FOR THE DRIVER. *AK					
Include, if available: Police/Fire Department Report, Photos, and Repair Invoice.			ATTACH ADDITIONAL SHEETS IF NECESSARY		
The Privacy Act of 1974-Public Law 93-502 The information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a Manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response or a statistical summary thereof, may be used in support of the agency's action.					

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

Vehicle Purchase on 5/23/05. After Purchase I ^{noticed} a problem with the windshield visually. GM informed me that a wavy appearance from a cross car window normal. However the position from the driver + passenger is clear and not affected according to GM Tech Note. In particular case the window has a wavy appearance horizontally across the driver and passenger field of view. It also has a warped magnifying glass effect in lower left and lower right sides. This very distracting to the driver and leads unsafe view of the road and eye strain.
