Subject: GMC 2001 Sonoma, Fuel Pump

*Received

10127955

I own a 2001 GMC Sonoma, in the past two years I have spent over \$2000 for fuel pump problems and I am still having problems with the fuel pump. Everyone I talk to are amazed how expensive the parts are and amazed that the vehicles are having these problems with so little mileage. First time was at 35,000 miles and now at 60,000 and still having problems. I see that there was a problem history and everyone I know is complaining about this. So why isn't anything being done about it? Please let me know what I need to do further to get this problem heard and something done about it.

Thanks
