Comments:

I'm reading your findings on the recalls for the F-150 trucks where there could be a fire started under the hood due to a bad cruise control switch. I have a 2003 F-250 deisel 6.0, and I had my truck in the shop for a failure to start problem and it caught fire while on the dealer's lot. The cause of the fire is unknown at this time but sounds very similar to latest recall. Please feel free to contact me regarding this issue. Thanks,

Balto. Md
