Comments:

I purchased my truck in july of 2003 from Wilkes Barre Dodge in Hanover PA. I month after I purchased it the abs and brake light would come on. I had it in there 3 times for the same problem and they installed an abs module and brake switch. Now the 14 months later the same problem happened and the warrenty is up and they won't fix it even though is was and existing problem. These vechiles are know to have this problem and they will not recall it. My rear brakes only work on my truck with no front brakes and they said if they fix repair it for me it will cost me over \$500. What can I do? please help thank you my phone number is [REDACTED]
