Dear Sirs

I thought I would
write and report I
feel in a sense is
a safety defect. I purchased
a 2004 Grand Jeep (New)
Cherokee Laredo and
have been very happy
with it. It was
purchased at the Jeep
dealership in Monroe, La.
The problem is as
you can see is
the head lite & bottom

lense is dull on
both sides. It clears
when you wash it
& dull when it dries.
My light are not
as bright as it use
to be. Has there
been a problem to
this lense covers
on the lights?
Or is there anything
to put on it to clear
it or what can be
done. I would appreciate
your help. Thank you.
