SUBJECT: SAFETY DEFECT WITH WINDOWS
OF CHRYSLER CIRRUS LXI

I am an owner of the above named car and I consider it a serious safety defect on my automobile as I am unable to open and close the power windows on my car. Sometimes three of them are functional and one window does not operate at all. My main concern is that the window on the driver's side does not always operate. If there was an automobile accident involving flooded areas, fire, or some other dangerous area, I and my passengers would not be able to get out of the car.

Owner:

Endwell, NY

Dealers Name: Matthews

Vestal Parkway, Vestal, NY

Vehicle Identification No. 4BSD GY - Expires 5/29/07
weight 3118 G 6 UTD4057 022 UTD

Delivery Date Year 2000, mileage 21275

This should be reported to the Daimler Chrysler Motors Corporation Customer Center.

The car only had a three year warranty.

Please advise what I should do, and thank you.
