Dear Sir:

I have a 2001- Buick Lesabre - 4D-Sedan
Serial No- 1G4HR54K [REDACTED] - My Problem is
when I dim at night with Right or Left
Down My Lights Totally when I go from dim to
Bright - This Happens only occasionally -
but is a total black out when it happens
so far with a quick pull on the Dimmer
lever it has come back on - the two
Different Dealers Cant tell me what it is
as it works ok in the service Dept.

Im afraid one day it may not come back
on & it is Telling when it happens & so far
no accidents, thank you for whatever you can
do. I will send this also to the.

NHTSA - Dept of Trans. as the book suggest.

Thank You - Sincerely,

Edinson
