Dear Sirs,

I purchased a 2005 Pontiac Vibe in April of 2005, vehicle identification number is 5Y25L63 [REDACTED]. On October 29, 2005 I was involved in an accident with this vehicle.

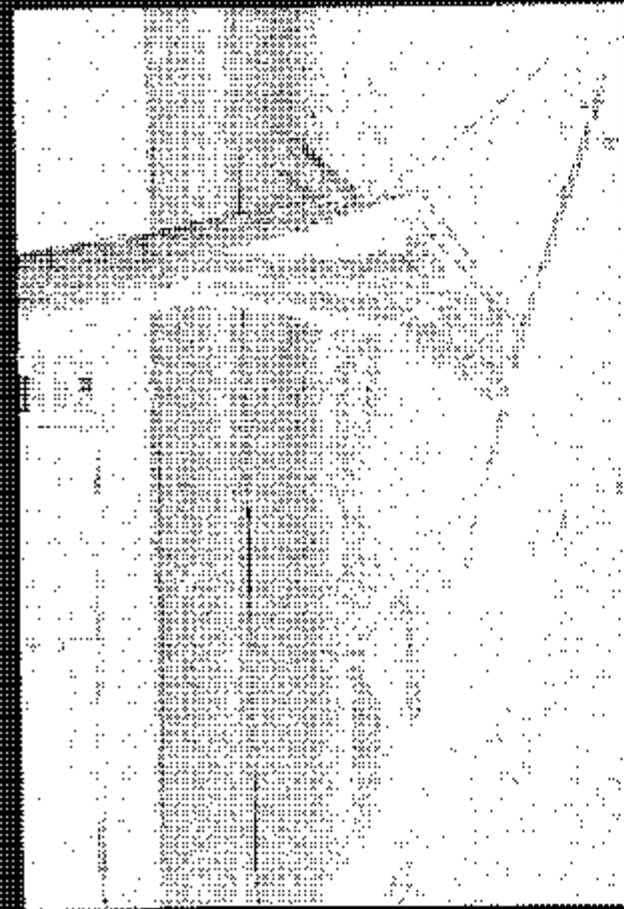

The events of this accident are: while moving and in the process of making a right turn I was hit from the rear. The vehicle then accelerated and struck a utility pole. Please review the enclosed photographs taken after the accident.

The concern I have is that the air bags did not deploy. I would like to know if this is standard or typical for the Pontiac Vibe.

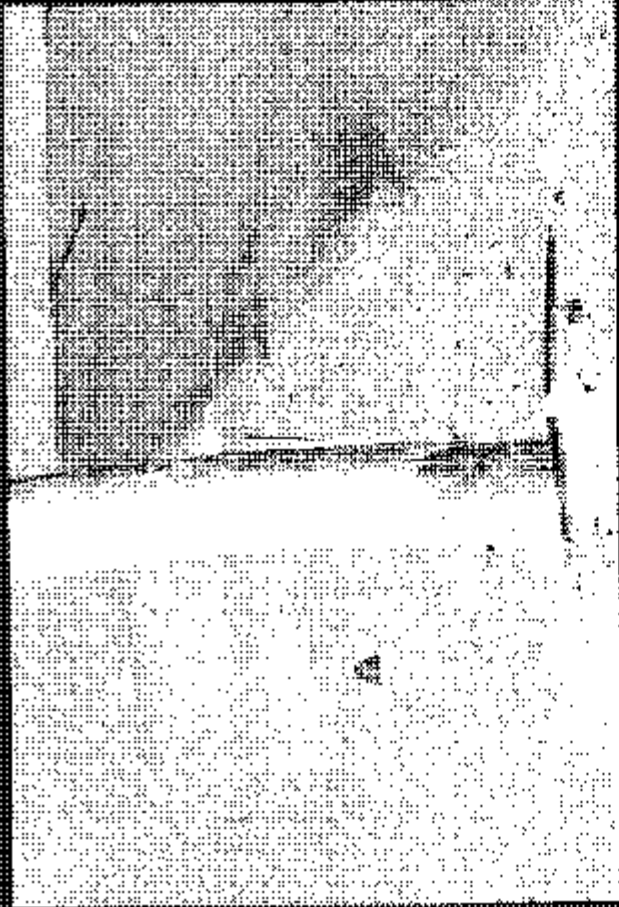

Sincerely,
[REDACTED]

Ans. Mari
