The Privacy Act of 1974 (Public Law 93-578) This information is requested pursuant to authority vested in the National Highway Traffic Safety Act and subsequent amendments. You are under no obligation to respond to this questionnaire. Your response may be used to assist the NHTSA in determining whether a manufacturer should take appropriate action to correct a safety defect. If the NHTSA proceeds with administrative enforcement or litigation against a manufacturer, your response, or a statistical summary thereof, may be used in support of the agency's action.

Narrative Description of Incident(s), Failure(s), Crash(es), and Injury(ies)

The problem occurs AT slow speed 5-10 mph. The erratic brake action on any type of surface - wet, dry AND more important SNOW packed roads + streets make it harder rather than easier to stop at slow speeds.

Brakes are supposed to work, period. They aren't supposed to pause, sputter and give you high factor factor when you try to stop.
