Re: [REDACTED]
Our File No. 99-364

Gentlemen:

I represent [REDACTED] with regard to the injuries they sustained in an automobile accident that occurred on May 25, 2001, and involved their 2001 Alpine Coach motorhome. The accident occurred when a brake light switch malfunctioned and caused the cruise control to stick. As a result, [REDACTED] had to run his vehicle off of the road in order to stop the vehicle. The Alpine motorhome was manufactured by Western Recreational Vehicles, Inc. and the brake switch at issue was manufactured by ASE Supply, Inc., now doing business as AGA Distribution Specialists, Inc.

I would be appreciative if you would advise whether or not any other similar complaints have been filed involving a brake light switch on an Alpine Coach motorhome that malfunctioned.

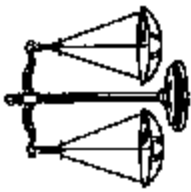

With kindest personal regards, I remain,

Very truly yours,

E. JAMES GAIDRY, JR.

gd
