Fred's RV World
41777 SE Highway 26
Sandy, Oregon 97055

Ref: Damon Intruder 2005
Model 373 - VIN 5B4MP6 [Redacted]

In December 2005 we received a follow up letter from Workhorse Custom Chassis regarding Recall Number 50402-C related to brake safety issues, in which they enclosed a copy of the original Notice sent out in December 2004. We did not own this motor home until March 2005.

As we were greatly alarmed to learn about the brake safety issue, we immediately wrote a letter to Workhorse asking for information related to the first Recall Notice - we wanted to know to whom was the original notice sent. We received a call from Mr. Winston Moore at Workhorse who said that in December 2004 they had sent the original notice to Damon Motor Coach, owner of record at that time. As the motor home had already been delivered to Fred's RV World, it is assumed that Damon sent the Notices of Recall to Fred's RV World. Following this chain of notification, Fred's RV World would then have been responsible for compliance with the Recall Notice and performing the necessary repairs to make the unit safe before selling it to anyone.

Due to the serious nature of this issue, we ask that Damon provide us with a copy of their letter to Fred's RV World informing them of the Recall Notice. Further, we ask that Fred's RV World provide us with copies of their file related to this Recall Notice on this unit and any repairs.

When we purchased this motor home from Fred's in March 2005, we were not informed about this Recall Notice or the potential danger of a brake problem. We have unknowingly been driving this unit, posing a danger not only to us but to other people on the road.

Please consider this our initial request for production of documents. We expect an immediate response from each of you with the requested copies.

Yours truly,
