Dear Mr. Jimenez,

Thank you very much for your letter dated March 21, 2006 regarding my complaint against the Subaru car company, copy enclosed. I very much appreciate your suggestions contained therein and will follow up on them. I will also be contacting the New Jersey Office of the Attorney General again.

Your reference to the statement by Mr. Grant Noble, Subaru's Customer Representative, that the fuel in New Jersey would not affect the vehicle's catalytic converter is duly noted. However, my work requires me to use the vehicle in other States where low sulphur fuels are not available and I did not purchase the vehicle for use only in New Jersey.

Again, thank you very much for your response and suggestions.

Very truly yours,
