To Whom It May Concern;

Last year I purchased a 2005 Ford Focus Zx4 at Asheboro Ford Company. I am having a problem when we have wind 10 to 20 miles per hour. Gusting to 25. I can't keep the car on the road. Yesterday on my way to work the wind was blowing and my car was going all over the road and the state highway patrolman notices it. He followed me to see if I was doing something wrong behind the wheel. If there is a recalled on 2005 Ford Focus Zx4, I want to know right a way. Something needs to be done to get these cars off the highway before we are killed.
