The dealer who repaired the vehicle stated to me that the brake system is the same in a Yukon and a Yukon Denali. All the parts are the same and they followed the same procedure to repair as stated in the recall. The Denali is not a different model vehicle it is a trim package offered on a Yukon. When I called GM they stated that it was the same vehicle with the same brake system but at this time they are not covering it under the recall due to the vin number . I thought you recalled a defective part or system no matter what the vin number. This is the most ridiculous thing I've ever heard of.
