RE: Our Claim Number: AU 05514158
Our Insured: [REDACTED]
Date of Loss: 8/16/2005
Your Claim Number: See Recall Notice

To Whom It May Concern:

Our Company is the insurance carrier for [REDACTED]

On or about 8/16/2005, our insured was involved in an incident. Our investigation indicates that your company is responsible for the incident. **Our insured rear-end a vehicle in front of them, which we feel is a direct result of the recall that our insured received on October 2005**

The purpose of this letter is to put you on formal notice of our subrogation rights in this matter and request reimbursement of the damages in the amount of \$6,176.85.

Supporting documents are enclosed for your review.

Please forward your check payable to "West American Insurance Company as subrogee of [REDACTED]"

If you have any questions regarding the above, please do not hesitate to call.

Sincerely,

Ohio Casualty Group
Subrogation Department

PONTIAC · GMC

Division of General Motors Corporation

05-514158

October 2005

Dear GMC Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Reason For This Recall: General Motors has decided that a defect, which relates to motor vehicle safety, exists in certain 2001 model year GMC Yukon XL vehicles located in severe corrosion areas. These vehicles may have a condition permitting corrosion to occur between the front hub/bearing assembly and the wheel speed sensor. If the brakes are applied while the vehicle is traveling at a speed of greater than 3 mph but less than 10 mph, the corrosion may cause an unwanted anti-lock brake system (ABS) activation. If this condition occurred where stopping distance is limited, a crash could occur.

What Will Be Done: Your GMC dealer will inspect, clean, and treat the affected area. In some cases, the front wheel speed sensor may require replacement. This service will be performed for you at **no charge**.

How Long Will The Repair Take? This service correction will take approximately 1 hour. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

Contacting Your Dealer: To limit any possible inconvenience, we recommend that you contact your GMC dealer as soon as possible to schedule an appointment for this repair. Should your GMC dealer be unable to schedule a service date within a reasonable time, you should contact the GMC Customer Assistance Center between the hours of 8:00 AM and 11:00 PM, EST, Monday through Friday. They can be reached at 1.866.996.9463. The deaf, hearing impaired, or speech impaired should call Text Telephone (TTY), 1.800.462.8583.

If, after contacting the GMC Customer Assistance Center, you are still not satisfied that we have done our best to remedy this condition without charge and within a reasonable time, you may wish to write the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 40990; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or go to <http://www.safercar.gov>.

Customer Reply Form: The enclosed customer reply form identifies your vehicle. Presentation of this form to your dealer will assist in making the necessary correction in the shortest possible time. If you no longer own this vehicle, please let us know by completing the form and mailing it back to us.

Reimbursement: The enclosed form explains what reimbursement is available and how to request reimbursement if you have paid for repairs for the recall condition.

Ferrara Proudly Introduces the "Complete Air Bag Protection System"

NEW ORLEANS, LA IAFC-Chris Ferrara, President and CEO of Ferrara Fire Apparatus, Inc. in Holden, LA proudly introduces the new Ferrara "Complete Air Bag Protection System", or C.A.P., the industry's safest, most-reliable occupant retention system.

In keeping with our 20 year commitment, Ferrara Fire Apparatus has consistently focused on designing and manufacturing Emergency Fire and Rescue Vehicles with one key factor always at the forefront, **FIREFIGHTER SAFETY!**, "We have always strived to engineer and design our complete line of apparatus utilizing the latest technology available combined with innovative ideas and premium materials to insure maximum firefighter safety", said Chris Ferrara, President and CEO. "We make every effort to consider all variables that you, the firefighters, may encounter in the dangerous conditions and adverse environments as you unselfishly protect the lives and property of others".

In 2003, Ferrara successfully completed months of testing on the Structural Integrity and Occupant Safety of our Inferno/Igniter Custom fire cabs. We used one of the worlds most comprehensive and rigorous safety standards, the Economic Commission for Europe Structural Standards also known as (ECE-R29) the benchmark for crash testing in the commercial trucking industry.

The test, conducted by certified aerospace engineers, placed weights weighing ten metric tons (22,000 pounds) on the roof of our cab to test the vertical load limits as required by ECE-R-29. Our 6061T-6 interlocking roof superstructure and extruded aluminum sub-frame supported the load without any damage or failure to the occupant compartment.

Next, we performed a frontal impact test to simulate the impact of a head-on collision. A 3736 pound pendulum subjected the front of the cab to forces 127% greater than that required by ECE-R29. To pass this rigorous test, the cab must not sustain damage beyond the point where the crew survival space is compromised. The robust design of our cabs and the precise manufacturing practices we insist on resulted in only minor damage to our cab and structural integrity was preserved.

Never being satisfied with only meeting the standards, we then placed 65, 979 pounds on the cab roof, 33 metric tons, three times and the ECE-R29 requirement, something no other fire apparatus manufacturer had ever attempted to insure we exceeded the standards. Once again the Ferrara Inferno/Igniter cab incredibly supported this massive load without sustaining any damage or failure of the crew area convincing us that we had achieved our goal of building the
