To whom it may Concern:

I am [REDACTED] from Hohenwald Tennessee. On April 22, 2006. I was in an accident in a 2002 Yukon Xh, the accident was a head on. The young man pulled out in front of me without looking. My vehicle was totaled and his was also, we were not seriously hurt thank goodness.

The reason I am writting is that the air bags on the Yukon Xh never deployed, on either the driver's side or passenger's side. I thought that this matter needed to be brought to your attention, to maybe check and see if there was something wrong with the air bag deployment system in the 2002 Yukon Xh. The air bags on the other car did deploy, mine did not.

My husband [REDACTED] has sense purchased another 2007 Yukon Xh, I hope this vehicle is ok with it's airbag system.

I do not like the material on the seats that are in this vehicle,

MAR
2007
9/24/06

it holds lint, the other vehicle's material was a better grade. There is not as much storage space under the seats, I guess it is because of the new flip up the seat system, I do not like.

It rides great and drives good. The material in them may need to be changed to something else.

Sincerely a concerned owner

[REDACTED]

Hohenwald, TN. [REDACTED]
