Narrative Description of Incident(S), Crash(es), and Injury(ies). Please describe (1) events leading up to the failure, (2) failure and its consequences, and (3) what was done to correct the failure; i.e., parts repaired or replaced (and if old part is available).

TL*- THE CONTACT STATED THAT THE 2003 CROWN VICTORIA POLICE INTERCEPTOR HAD A RECALL 04V328000 THAT WAS REPAIRED 08/24/04 FOR THE REAR SUSPENSION. HE STATED THAT THIS WAS THE SECOND FAILURE. WHILE DRIVING AT 45 MPH ON THE PARKWAY THE VEHICLE LOST POWER. THE VEHICLE WOULD NOT REGAIN SPEED AND HE COASTED DOWN THE HILL TO THE AUTO DEALERSHIP. HE HEARD A SCREECHING NOISE COMING FROM THE REAR AXLE. ON THAT DAY HE WAS TAKING THE VEHICLE TO HAVE THE RECALL REPAIRED. THE CONTACT STATED THAT THE RECALL WAS REPAIRED, AND THERE WERE NO PROBLEMS WITH THE VEHICLE UNTIL 02/27/07. WHILE DRIVING AT 55 MPH ON A CLEAR DAY THE VEHICLE MADE A SCREECHING NOISE FROM THE REAR AND THE VEHICLE CAME TO A COMPLETE STOP ON THE HIGHWAY DURING RUSH HOUR. HE SMELLED SMOKE, AND NOTICED A HUGE CLOUD OF SMOKE COMING FROM THE REAR DRIVER'S SIDE. THE CONTACT STATED THAT THIS VEHICLE WAS STUCK IN THE EXPRESS LANE AND COULDN'T MOVE IT. HE STATED THAT HE JUMPED OUT THE VEHICLE AND NOTICE THE TIRE WAS POINTED AT A 45 DEGREE ANGLE. THE CONTACT PLACE THE GEAR SHIFT LEVER IN PARK AND THE VEHICLE ROLL BACKWARDS, HE STATED THAT HE GOT THE VEHICLE TO STOP BY PUTTING SOME ROAD DEBRIS BEHIND THE WHEEL AND TURN THE STEERING WHEEL TO GET THE WHEEL TO CHANGE ANGLES. HE WAS ABLE TO STOP THE VEHICLE FROM ROLLING BACKWARDS. THE CONTACT HAD THE VEHICLE TOWED TO THE DEALERSHIP, AND WAS INFORMED THAT THE REAR AXLE BROKE, AND THE BRAKED LINE RUPTUR

Comments:

Regarding the Blue Ridge Parkway's 2003 Crown Vic police cruiser that was towed to your shop for repair - please contact ASHE COUNTY MOTORS in West Jefferson, NC @ 336-246-3673 for any information that you need related to the warranty repairs that they performed to the rear axle of this vehicle in August of 2004.

Call me or Thomas Ham at 336-372-8568 to advise status of repairs needed at this time, estimated costs, and whether or not these repairs can be covered by Ford warranty. We would like to get this vehicle back in service as soon as possible.

Neither Thomas or myself will be in the office the rest of this week, however, you can call Brent Pennington at the same number if you need addl. Info or clearance before next Monday.

Thanks,

**SAFETY RECALL
04S16****Certain 2003 Model Year Ford Crown
Victoria Police/Commercial and Lincoln
Town Car Vehicles Sold to Fleets - Rear
Axle Shaft Fracture**

Frank M. Ligon
Director
Service Engineering Operations
Ford Customer Service Division

Ford Motor Company
P.O. Box 1904
Dearborn, Michigan 48121

August 2004

TO: All U.S. Ford and Lincoln Mercury Dealers

SUBJECT: Safety Recall 04S16: Supplement #1
Certain 2003 Model Year Ford Crown Victoria Police/Commercial and Lincoln
Town Car Vehicles Sold to Fleets
Rear Axle Shaft Fracture

RE: Safety Recall 04S16 Dated July 6, 2004
Certain 2003 Model Year Ford Crown Victoria Police/Commercial and Lincoln
Town Car Vehicles Sold to Fleets
Rear Axle Shaft Fracture

New REASON FOR THIS SUPPLEMENT

This bulletin is being re-issued to add a reminder to the Technical Instructions regarding re-installation of the differential cover shield if previously installed on CVPI vehicles under Optional Upgrade Program 02B02, and/or the re-installation of any other components removed while performing Safety Recall 04S16.

AFFECTED VEHICLES

- Certain 2003 model year Ford Crown Victoria Police/Commercial (Body codes P70, P71 and P72) vehicles built at the St. Thomas Assembly Plant from October 10, 2001 through December 4, 2002.
- Certain 2003 model year Lincoln Town Car vehicles sold to fleets (Body codes M84 and M81 ordered with FIN code) built at the Wixom Assembly Plant from November 14, 2001 through December 4, 2002.

Affected vehicles are identified in OASIS. In addition, for a list of vehicles assigned to your dealership, visit <https://web.fsavinlists.dealerconnection.com>. This information will be available on July 8, 2004.

REASON FOR THIS SAFETY RECALL

Due to significant differences in vehicle design and customer usage, the affected vehicles typically input higher loads into the vehicle chassis during fleet usage, overloading the wheel bearings and axles. This may lead to early bearing failure and ultimately, axle shaft fracture. In the event of axle shaft fracture, the vehicle would lose drive function and would coast to a stop. Loss of drive function could lead to a vehicle crash.

Field Service Action 04S16

Page 2 of 2

SERVICE ACTION

At no charge to the vehicle owner, dealers are to install an axle repair kit consisting of new rear axle shafts, rear wheel bearings, and rear axle seals. This must be performed on all of the affected vehicles in your inventory as well as vehicles that have been delivered to customers.

Based on our records, vehicles that were previously repaired with axle repair kit 3W1Z-4A109-AA (introduced with Technical Service Bulletin #03-05-05) do not require any further repair and are not included in this program.

PLEASE NOTE:

Correct all vehicles in stock before delivery. Federal law requires dealers to complete any outstanding safety recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement by a dealer could result in a civil penalty of up to \$5,000 per vehicle.

ASHEVILLE, NC 28803-8686

At Ford Motor Company, it has been our goal for more than 100 years to provide customers with high-quality, dependable products. In order to maintain these standards, Ford Motor Company is providing additional coverage under Customer Satisfaction Program 04M05 to owners of certain 2003 Crown Victoria Police and Commercial Heavy Duty Vehicles in police and taxi service who may experience a cracked steel road wheel.

What is the reason for this additional coverage program?

In the interest of customer satisfaction, Ford Motor Company is extending the limited warranty on certain steel road wheels to a total of 5 years or 150,000 miles from the warranty start date, whichever occurs first.

Our records indicate that you previously had new wheels installed per Safety Recall 03S05 for this vehicle. This extended coverage is being provided because a very small percentage of these wheels may, under extreme usage conditions, experience a crack as a result of stress risers in the wheel rim. Over time, this condition may cause a wheel to crack near the weld line that connects the rim to the disk, resulting in slow air loss and degraded vehicle handling.

This coverage exceeds the provisions of your car's original vehicle warranty coverage for this part.

What will Ford and your dealer do?

If you experience a cracked wheel, your dealer will install a new steel wheel of revised design at no charge to you under the terms of this program. Symptoms of a cracked wheel may include:

- Repeated slow air leak
- Nibble in the steering
- Difficulty in balancing the tire & wheel assembly

A cracked wheel typically presents itself as slow, repeated air leak. A cracked wheel can lead to air loss and degraded vehicle handling. Ford expects only a small percentage of affected steel wheels to experience this condition.

How long will it take?

The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

What are we asking you to do?

Please keep this letter as a reminder. If you experience a cracked wheel, and your vehicle is within the indicated time/mileage limitations, contact your dealer for a service date. Your dealer will install a new steel wheel of revised design at no charge to you.

When you bring your vehicle in, show the dealer this letter. If you misplace this letter, your dealer will still do the work, free of charge.

If you do not already have a servicing dealer, please access www.dealerconnection.com for dealer addresses, maps, and driving instructions.

Ford strongly recommends against swapping wheel and tire assemblies among vehicles - especially vehicles affected by previously announced Safety Recall 03S05 which have wheels manufactured from August 18, 2001 through September 22, 2002 (vehicles built from October 10, 2001 through September 30, 2002). Installing a wheel from Safety Recall 03S05 on a vehicle will increase the risk of having a wheel crack during use and, consequently, may increase the risk of accident, personal injury or death.

Attached is information on how to check wheel manufacture date. Should you choose to mix wheel and tire assemblies among vehicles, checking the wheel manufacture date will reduce the likelihood of installing a 03S05 affected wheel on a vehicle. If a 03S05-affected wheel has been moved to a vehicle that has had either Safety Recall 03S05 performed or to a vehicle that is eligible for Customer Satisfaction Program 04M05, return to your servicing dealer.

Have you previously paid for this repair?

If you paid to have this service done before the date of this letter, Ford Motor Company is offering a refund. For the refund, please give your paid original receipt to your dealer. To avoid delays, do not send receipts to Ford Motor Company.

Can we assist you further?

If you have difficulty getting your vehicle repaired promptly and without charge, please contact your dealership's Service Manager for assistance.

If you still have concerns, please contact the Fleet Customer Information Center at 1-800-34-FLEET and one of our representatives will be happy to assist you. Representatives are available 8:30AM to 6:00PM Monday through Friday (Eastern Time Zone).

Or you may contact us through the internet at www.fleet.ford.com.

Thank you for your attention to this important matter and remember to save this letter in case you need to take advantage of this additional coverage program.

Sincerely,

Frank M. Ligon
Director
Service Engineering Operations

CUSTOMER SATISFACTION PROGRAM 04M05

STEEL WHEEL INSPECTION

INSPECTION

1. Remove the hub caps or, if equipped, the full wheel covers by gently prying off the center cap, then loosening the five (5) plastic nuts securing the cover to the lug nuts.
2. Inspect the engineering part number suffix on all wheels including the spare. See Figure 1. The engineering part number is located on a raised surface on the outside face of the wheel between two lug bolt holes. The suffix is the last two letters of the part number.
3. Wheels with the engineering part number suffixes CC or CD —
 - Inspect the date code to see if the wheel is subject for replacement per Safety Recall 03S05. Go To Step 5.
4. Wheels with engineering part number suffixes CF, AA or CG —
 - No date code inspection is necessary.
 - Wheels are subject for replacement per Customer Satisfaction Program 04M05 **only** if the vehicle is exhibiting any of the following symptoms:
 - repeated slow air loss from a wheel/tire other than loose or damaged valve or valve stem,
 - nibble in the steering wheel,
 - or difficulty in balancing the wheel and tire assembly (lateral runout).

If you experience these symptoms, contact your dealer to schedule a service appointment.

FIGURE 1

04X53A

5. Clean the wheel around the valve stem as necessary and read the build date code. See Figure 2.

NOTE: The date code is stamped in one of two locations: either on the inboard side of the wheel near the bead, or next to the valve stem and is visible from the outside once the full wheel cover is removed and the area around the valve stem is cleaned. If the date code cannot be read, contact your dealer for assistance.

Wheel build date codes are shown as follows:

- Any wheel found to be built from August 18, 2001 through September 22, 2002 (date codes "K401 8 18" through "K402 9 22") must be replaced even if no evidence of cracks are present per Safety Recall 03S05. Contact your dealer to schedule a service appointment.
- Any wheel found to be built after the date range listed above is not eligible for replacement per Safety Recall 03S05, but is still eligible for possible replacement under Customer Satisfaction Program 04M05 **only** if the vehicle is exhibiting any of the following symptoms:
 - repeated slow air loss from a wheel/tire other than loose or damaged valve or valve stem,
 - nibble in the steering wheel,
 - difficulty in balancing the wheel and tire assembly (lateral runout).

If you experience these symptoms, contact your dealer to schedule a service appointment.

Have you previously paid for this repair?

If you paid to remedy the issue addressed in this notice, you may be eligible for a refund either through your dealer or directly from Ford Motor Company.

To verify eligibility and expedite reimbursement, give your paid original receipt to your dealer. Refund requests, including all required documentation, may also be mailed to Ford at P.O. Box 6251, Dearborn, Michigan 48121-6251. Refund requests mailed to Ford may take up to 60 days to process.

Detailed information regarding eligibility for Ford's reimbursement program and documentation requirements may be obtained by contacting the Ford Customer Relationship Center at 1-866-436-7332. Owners who have previously paid for this repair are still eligible to have the recall described in this letter performed.

Have you changed your address or sold the vehicle?

If you have, please fill out the enclosed prepaid postcard and mail it to us so we can update our records. If you have sold the vehicle, the information you provide on the postcard will be used to notify the new owner about this recall.

Can we assist you further?

If you have difficulty getting your vehicle repaired promptly and without charge, please contact your dealership's Service Manager for assistance.

Fleet Owners: If you still have concerns, please contact the Fleet Customer Information Center at 1-800-34-FLEET and one of our representatives will be happy to assist you. Representatives are available 8:30AM to 6:00PM Monday through Friday (Eastern Time Zone). Or you may contact us through the internet at www.fleet.ford.com.

All Other Owners: If you still have concerns, please contact the Ford Motor Company Customer Relationship Center and one of our representatives will be happy to assist you.

Call 1-800-392-3673. For the hearing impaired call 1-800-232-5952 (TDD).
Office Hours: (Eastern Time Zone)

Monday – Friday: 8AM – 5PM

If you wish to contact us through the Internet, our address is:
