Mar 23, 07

Dear Sir,

I bought a 2006 malibu Max
Jan 3, 07.

I had trouble right away with
the car shaking. Took it a
total of 4 times before 30 days
warranty. First 2 times they
told me it was from snow in
the wheels. Next two times found
nothing but same time. They
told me it wouldn't hurt any
thing, but it was thumping & shaking
so bad it has to do damage to
the vehicle.

If it is going to be that way
in snow then how can you
drive it in winter?

If that's what's wrong then
something is wrong with the
wheels. Thank You

Luisa Fuller
