Subject: 2005 Buick Allure Gas Guage

I have a 2005 Buick Allure when the gas gauge shows just slightly under a ¼ tank it will drop rapidly to show to the empty mark and in one instance I had driven for 50 miles before I could get to service station to fill up the gauge still stayed on the empty mark. I filled the gas tank right to the top and it only took 48.4 litres. The gas tank will hold over 60 litres.

Has anyone else submitted this type of information.
