Dear NHTSA:

On April 30, the Honda Civic owned by me, self-accelerated suddenly and di not cease to stop when I applied the traditional foot brake, crashing at alarming speed into a metal barrier in a gas station. The auto is totaled in damage, front end destroyed, all 4 air bags deployed, engine pushed up into firewall edge, auto framing dismantled.

This is unprecedented since the auto had 3 years and slightly over 3,000 miles in total mileage, church driver.

AUTO INFORMATION:

YEAR: 2004 MAKE/MODEL/TYPE: HONDA, CIVIC, 4 DR. SEDAN

VIN: 2HGES18414H [REDACTED]

MILEAGE: 3,100+

I have an excellent driving record, my D.L. from N.J.: [REDACTED]

UNION P.D. # [REDACTED]

08/31/10 EXP.

Sincerely,
[REDACTED]
