Dear [REDACTED]:

Thank you for your correspondence dated June 24, 2007, concerning your model year (MY) 2001 Nissan XTerra vehicle. Your correspondence was received by the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation on July 9, 2007. We regret any inconvenience our delay in responding may have caused you.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain serious safety defects in their design, construction, or performance. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the previous report you provided. Reports from motorists are a very important source of information for us. Each report is analyzed and entered into a database to determine whether an investigation into a possible safety defect is warranted.

A review of our database relative to electrical fires in MY 2001 Nissan XTerra vehicles revealed insufficient evidence to warrant opening a safety defect investigation at this time. The information you provided has been entered into our database.

It will be considered with future reports to identify any safety defect trends that may require our attention.

Sincerely,

A handwritten signature in black ink, appearing to read 'K. DeMeter', with a long horizontal flourish extending to the right.

Kathleen C. DeMeter, Director
Office of Defects Investigation
Enforcement
