Subject: 2004 Lincoln Navigator
VIN 5LMP27R84 [REDACTED]

I driven this car about 20,000 miles
in the past year. During that time, when
the brake was applied the engine
accelerated as if the gas pedal was
being push in. One time recently it
almost caused a serious wreck. A
friend of mine told me that she had
the same problem with a older model
navigator. Am I in danger
driving this car?
