Dear [REDACTED]:

Thank you for your correspondence concerning your model year (MY) 2006 Chevrolet Corvette vehicle. Your correspondence was received by the National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation on August 8, 2007.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain serious safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. Each report is analyzed and entered into a database to determine whether an investigation into a possible safety defect or recall inadequacy is warranted.

The information you provided has been entered into our database and will be reviewed. It will be considered with other reports to identify any inadequacies of the recall campaign (NHTSA Campaign No. 06V181000, summary enclosed) that may require our attention. Also, we notified General Motors Corporation (GM) of the difficulty you experienced in having the safety-related corrective action for the recall performed on your 2006 Chevrolet Corvette. GM

is not required to provide a "Factory Test". If you have any questions regarding this matter, please contact Mr. Richard Willard, Consumer Safety Officer at 1-877-538-8368 ext. 66544.

Sincerely,

A handwritten signature in black ink, appearing to read 'K. DeMeter', followed by a long horizontal line extending to the right.

Kathleen C. DeMeter, Director
Office of Defects Investigation
Enforcement
