Dear Mr. Fields:

I previously completed a VOQ form on my recently purchased 2006 Mercury Marquee (VIN/2MEFM74V96X [REDACTED] which I had reported problems with the car lurching forward as you apply the brakes, which, in my opinion "the brake pedal is too close to the gas pedal". I am still having the same problems and it is very dangerous. My auto has the device that lowers the gas & brake pedal at the same time, my opinion is that they are too close together.

I have reported this to RICKART FORD PO BOX 27130, COLUMBUS, OHIO.

I have never received an answer from you., other than my form that I submitted. Your letter indicates NVS-216cg.

RESPECTFULLY, I REMAIN:

[REDACTED]
