NVS-216 et
Ref. No. 10226270

Dear [REDACTED]:

Thank you for your correspondence dated April 17, 2008, concerning the problems you encountered with your model year (MY) 2003 Volkswagen Passat. The National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation received your correspondence on April 30, 2008.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain serious safety defects in their design, construction, or performance. We also monitor the adequacy of manufacturers' recall campaigns. In order for the agency to initiate an investigation, we look carefully at the body of consumer complaints and other available data to determine whether a defect may exist. We cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We appreciate the report you provided. Reports from motorists are a very important source of information for us. A review of our database relative to problems associated with the engine, specifically camshaft sensors, in MY 2003 Volkswagen Passat vehicles revealed no reports of problems similar to that which you encountered; therefore, there is insufficient evidence to warrant opening a safety defect investigation at this time. The information you provided has been entered into our database. It will be considered with future reports to identify any safety defect trends that may require our attention.

With regard to the safety recall involving the fuel pump in MY 2003 Volkswagen Passat vehicles, Federal regulations require a manufacturer conducting a safety recall of motor vehicles or motor vehicle equipment to reimburse owners who have paid to obtain a remedy for the

problem within a reasonable time, which in many instances is one year, prior to the manufacturer's notification. Certain restrictions apply, including the need to submit certain documents to the manufacturer. Owners should follow the instructions in the recall notification letter to file a claim. Owners who feel that their claim was wrongfully denied should pursue the matter with the manufacturer. Owners may also report any dispute to NHTSA by contacting the Department of Transportation's (DOT) Auto Safety Hotline (Hotline) or by filing a complaint via the agency's Internet Web site. While NHTSA does not have the resources to intervene in individual disputes, it does monitor this data and may address situations where appropriate.

Additionally, our statute does not require manufacturers to reimburse owners for costs associated with a safety recall (e.g., lost wages while the vehicle is being repaired, car rentals, damage caused by the defect, etc.). Nor does the statute authorize the Federal government to reimburse vehicle owners for any costs associated with safety recalls or assist vehicle owners in obtaining reimbursements for costs associated with an alleged defect.

We sympathize with you concerning the service problems you reported; however, this does not fall under our jurisdiction. If you have not done so, you may consider contacting your the Federal Trade Commission (FTC). The FTC has jurisdiction over paint, fraud or deception, warranty and dealership problems, remuneration matters, and fair trade practices. There are three ways you can contact the FTC: by toll free telephone at 1-877-FTC-HELP (1-877-382-4357); by mail at Federal Trade Commission, CRC-240, Washington, DC 20580; and by using the Internet complaint form at <http://www.ftc.gov/ftc/complaint.htm>.

Should you encounter a safety-related problem with a motor vehicle or item of motor vehicle equipment in the future, you can complete an electronic Vehicle Owner's Questionnaire online at <http://www.nhtsa.dot.gov/ivoq>. Also, a summary listing of vehicle owners' complaints, safety recalls, manufacturers' service bulletins, etc. can be obtained at <http://www.nhtsa.dot.gov/cars/problems>.

Sincerely,

A handwritten signature in black ink, appearing to read "Ronald B. Fields". The signature is fluid and cursive, with the first name "Ronald" being the most prominent.

Ronald B. Fields, Chief
Correspondence Research Division
