Administration

1200 New Jersey Avenue SE
Washington, DC 20590

Dear Consumer:

NVS-216rbf

As a result of your report to the Vehicle Safety Hotline (VSH), we have recorded that report on the enclosed Vehicle Owner's Questionnaire (VOQ) form. Please review the form and make changes, additions and corrections as necessary. Additionally, please provide a more detailed description of the failure(s) you reported that you believe relevant to safety. Also, if available, include copies of repair invoices, letters to the manufacturer, or any other document related to the problem(s) you reported. If a crash or fire occurred, include a copy of the police or fire department report.

It is helpful to be as thorough as possible in your report so that our ability to use your report will be maximized. If you do not have the information, it is not necessary to complete all the boxes. However, it is very difficult to identify the scope of a vehicle problem unless the vehicle identification number (VIN) is known. The VIN is located inside the vehicle on the dashboard adjacent to the left (driver's side) of the windshield pillar and on the drivers' door or the drivers door jam. It may also be listed on the dealer's repair invoices. When reporting a tire problem, the brand name, tire name and complete tire size should be included. If possible also provide the DOT tire identification number. It is usually located near the rim flange of the tire on either side of the tire.

The Privacy Act prohibits our agency from identifying you to the manufacturer without your permission. If you wish to give us that permission, please mark the appropriate authorization box and sign the form to allow us to provide your name to the manufacturer. The information you provide may assist the manufacturer and NHTSA in determining if a safety-related defect exists.

Any information provided is entirely voluntary. There is no consequence or penalty of any kind if you do not wish to provide it. We seek this information to develop both statistical and investigative evidence that will help identify potential safety related problems in vehicle or vehicle equipment, e.g., tires, child safety seats, jacks, etc.

When completed, please fold and staple or tape the form so that the pre-addressed portion of the form is on the outside. If a larger envelope is used, tape the VOQ form to the larger envelope so that the pre-addressed portion of the form is showing.

If further assistance is needed, please contact the VSH at their toll-free number, 1-888-327-4236.
Thank you for your cooperation.

Sincerely,

Ronald B. Fields, Chief
Correspondence Research Division
Enforcement

The recall of defective Firestone tires and Ford Explorer rollovers have been center stage in all product liability news stories. Bridgestone and Firestone were forced to recall millions of their ATX, ATX II and Firestone

Wilderness radial tires due to tire tread separation, which was causing sport utility vehicles (SUVs) to lose control and roll over. Besides Firestone, many other tire manufacturers have also had similar tire tread or belt adhesion problems. These tire manufacturers include: Continental General Tire Company, Cooper Tire Company, Kelly Springfield Tire, Dunlop Tire, Goodyear Tire, Kumho Tire, and others. When a tire tread separation occurs at highway speed, a rollover is too often the result.

"A consumer shouldn't be sentenced to death or be given a life sentence with catastrophic injuries because tire and vehicle manufacturers stress profits over product safety. Tire companies must stop making low quality tires. It is time to force them to be accountable to those they have injured or killed and clean up their act." — David P. Willis, Attorney at Law

Tire Tread Separation, Failure and Tire Defects
A tire defect during manufacturing can result in a tire tread separation. Tire tread separation at highway speeds may cause a rollover and resulting roof crush. A tire tread failure or blowout can cause a SUV to lose control and potentially roll over. Many rollover accidents cause serious injury, even death.

Tire Failures, Blowouts and Rollover Accidents
Weak vehicle roofs, roof pillars, roof headers and supports of SUVs, trucks and vans often fail and collapse during rollovers. Rollovers in vehicles with weak roofs often crush the occupants causing spinal cord injury, closed head injuries, paralysis, paraplegia, quadriplegia, anoxic brain damage, and death.

Tire Recall Information
Many tires have been recalled over the last few years due to tire manufacturer defects, tire failures and flaws which result in sudden tire failures, tire de-treading or delamination, and tire blowouts. Recalls include the: Firestone tire recall, Cooper tire recall, Continental General tire recall and others.

Tire / Rim Explosions
While trying to fix a flat, many tire workers can be blinded, maimed, or even decapitated when a tire explodes. Most of these exploding tires have been previously filled with a can of tire sealant to fix an air leak. Propellant in the tire sealant may contain butane or propane. When an ignition source is present, an explosion may result.

Tire Defects and Tire Defect Lawsuits

If you or a loved one has been seriously injured in an auto accident due to a defective tire (tread separation, blowout or tire failure) resulting in a rollover, then you may have the right to file a legal action. Frequently the vehicle manufacture, tire maker, and distributors are joined in a products liability lawsuit when a rollover occurs from a tire defect.

The Willis Law Firm has represented dozens of seriously injured victims and families of tire defect accidents and SUV rollovers. Mr. Willis is a Board Certified Personal Injury Trial Lawyer certified by the Texas Board of Legal Specialization. Mr. Willis has practiced personal injury law and products liability law for over twenty three years.

If you would like to have you case reviewed for free, please use our confidential injury evaluation form by following the link below, or if you prefer, call us toll free at 1-800-883-9858 to speak with a products liability lawyer.
