I own a 1998 Grand Prix GT, In the recall list, you state a recall on the rack and pinion assembly. It states that the retainer was possibly not crimped properly and could come loose. I have owned the car for about 6 years and was wondering if this is something I can still have inspected or if there was a time limit. It is recall # 02V286000, bulletin #02049. Thank You
