San Francisco
CA

Dear Sir,

I have a Honda Civic LX (2005)
That going down hill on a steep hill
that when you tap the brake
the car ~~sway~~ goes to the left & right &
it's hard to control. This happens
every time I go on Caldecott Tunnel
in California. The dealer Serrano
Honda & San Francisco Padua
could not find anything when I had
it checked. Just wondering if any
civic has this problem.
The vehicle # 2HGES16555H [REDACTED]
I notified Honda Corporation about
this matter.
