US CUSTOMER SAFETY COMM.
4330 EAST WEST HIGHWAY
BETHESDA MD. 20814-4408

DEAR SIR:

2008 SEP - 8 PM 2:11

I PURCHASED FROM MODERN MAZDA A 2006 MODEL

JMIBK12G3G1

STOCK M G23G - MAZDA 3 ON 12/05

IT HAS ABOUT 29M MILES AND HAS HAD ALL THE OIL CHANGES
DONE AT MODERN MOTORS. EACH VISIT I COMPLAINE
ABOUT THE HEIGHT AND SPACING BETWEEN THE BRAKE
AND ACCELERATOR, OR PERHAPS THE LACK OF DIFFERENCE
BETWEEN THEM.

MY SHOE SIZE IS 10 DOUBLE EE AND COUNTLESS
TIMES, WHEN I AM STOPPED AT A LIGHT, OR
STOPPING, MY SHOE WILL PUSH THE BRAKE PEDAL
DOWN AND SOME TIMES JUST HIT THE ACCELERATOR
PEDAL CAUSING THE CAR TO JUMP AHEAD. THIS HAPPENED
MAY/10/08 AND I REAR ENDED THE CAR IN FRONT
OF ME, LUCKLY, WE ONLY TAPED BUMPERS, A FIX MIGHT
BE TO ADD A 1/2 INCH BLOCK TO THE BRAKE PEDAL OR MAKE
MORE HORIZONTAL ROOM BETWEEN THE TWO. IN ANY EVENT
THIS I BELIEVE TO BE A SERIOUS SAFETY PROBLEM. ON
THIS MAZDA # 3

I TRY NOW TO ALWAYS SHIFT OUT OF DRIVE WHEN
I STOP, TO PREVENT MY CAR FROM JUMPING AHEAD.

I ALSO DRIVE A 03 CHEVY P.U TRUCK, AND HAVE HAD
OLDER CHEVY'S PU IN THE PAST, AND TO MY KNOWLEDGE
NEVE HAVE HAD THIS PROBLEM. (ALL AUTOMATIC)

I LIKE THIS MAZDA VERY MUCH, BUT HATE THIS PROBLEM
SINCERLY
