Dear [REDACTED]

Thank you for your correspondence dated August 31, 2008, concerning your model year (MY) 2003 Dodge Intrepid. The National Highway Traffic Safety Administration's (NHTSA) Office of Defects Investigation received your correspondence on September 26, 2008.

NHTSA is the Federal agency responsible for improving safety on our Nation's highways. We are authorized to order manufacturers to recall and repair vehicles or items of motor vehicle equipment when our investigations indicate that they contain safety defects in their design, construction, or performance. However, we cannot act on isolated problems or resolve disputes between individual owners, dealers, or manufacturers.

We have reviewed our database in an effort to identify whether a safety defect trend exists with regard to driver's side interior door handle failure in MY 2003 Dodge Intrepid vehicles. At this time, there is insufficient evidence to warrant opening a safety defect investigation. A brochure explaining the investigation process is enclosed for your information. The information you provided has been entered into our database and will be considered with future reports to identify any safety defect trends that may require our attention. We will continue to monitor this issue and will take further action as necessary.

Should you encounter a safety-related problem with a motor vehicle or item of motor vehicle equipment in the future, you can complete an electronic Vehicle Owner's Questionnaire online at
